

The background is a complex, low-poly geometric pattern. It features a large, central cluster of blue triangles in various shades, ranging from light sky blue to deep navy blue. To the left of this main cluster, there are several smaller, distinct triangles in other colors: a green one at the top left, an orange one below it, a blue one further down, a purple one at the bottom left, and a teal one at the bottom center. The overall effect is a dynamic, crystalline structure.

# IBM Point of View: The Facilities Management Industry

# Future of the Facilities Management Industry

Substantial cost reduction and the creation of new value propositions within and without the current value chain are enabled by the adoption of platform-based business models

# Forces in Facilities Management Industry

Operational  
excellence

Productivity

Competition

End-customer centricity

# Impact: Engineering, Construction and Facilities Management: from linear value chain to value clusters

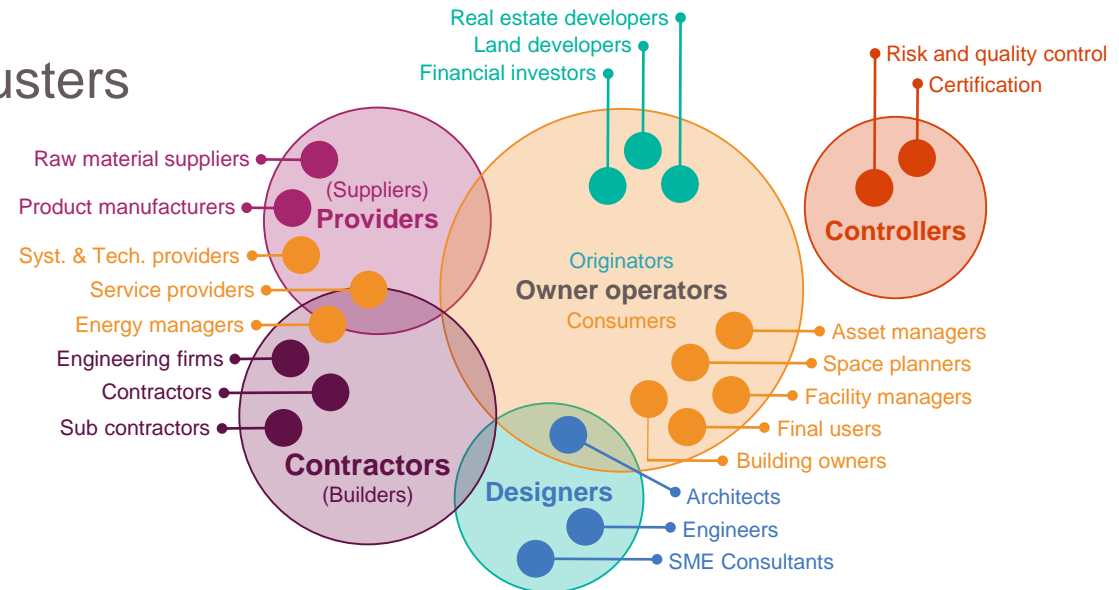

Linear value chain

Value-centred  
value chain

Value Clusters

Although many players still operate within a linear value chain, some already moved towards a value-centred value chain. But the future lays in value clusters!

# Strategic responses: Where is change happening? How to respond?

1

Value Chain Component

“4 walls” – protect and grow  
current business

Customer centricity  
Safety, security, reliability  
Ruthless efficiency/ automation  
HR, IT, Procurement efficiency  
Workforce deployment

2

End to End Value Chain

“Redesign FM Value Chain”

Business networks  
Collaboration  
Ecosystem plays within industry  
Exploiting owned data  
Using expertise  
Digital reinvention

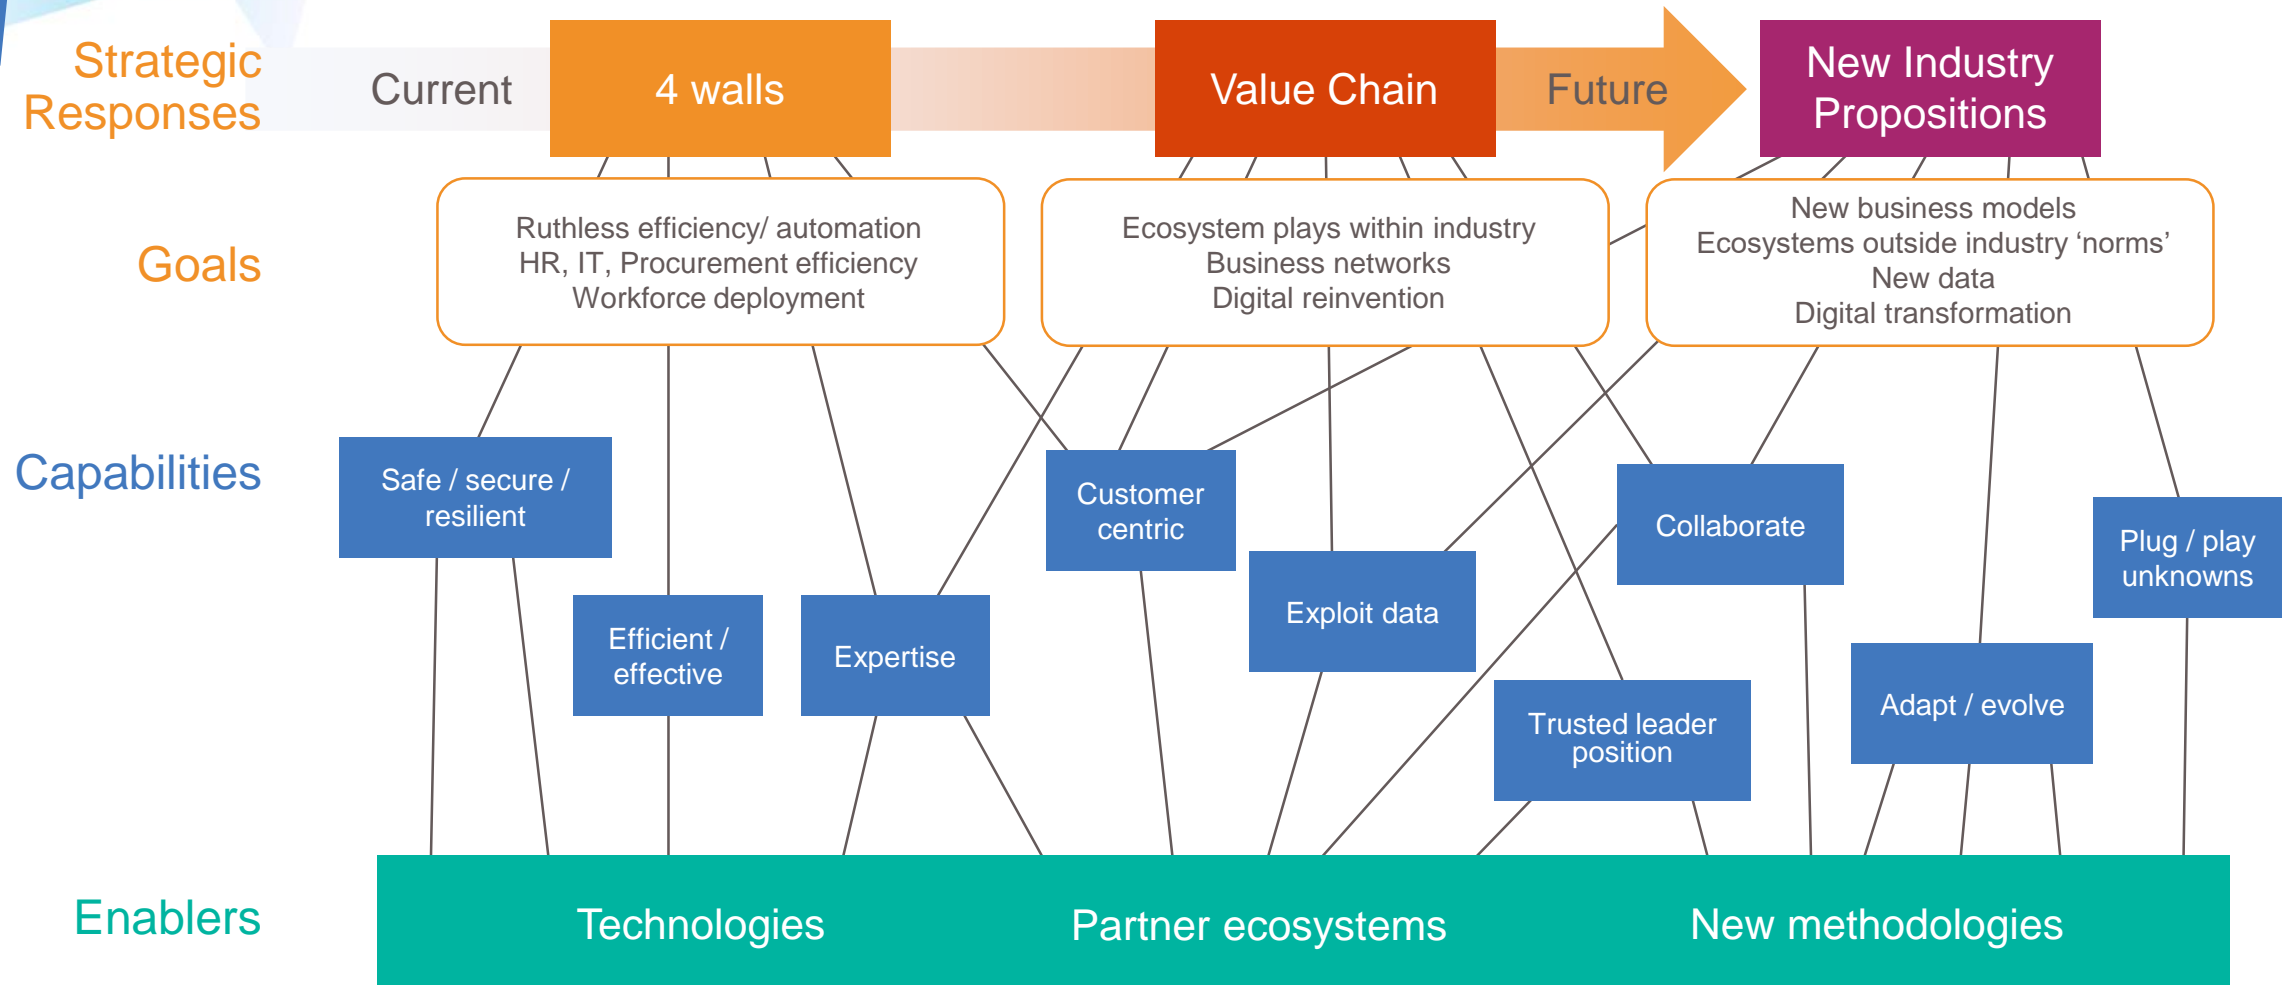

3

Value Clusters

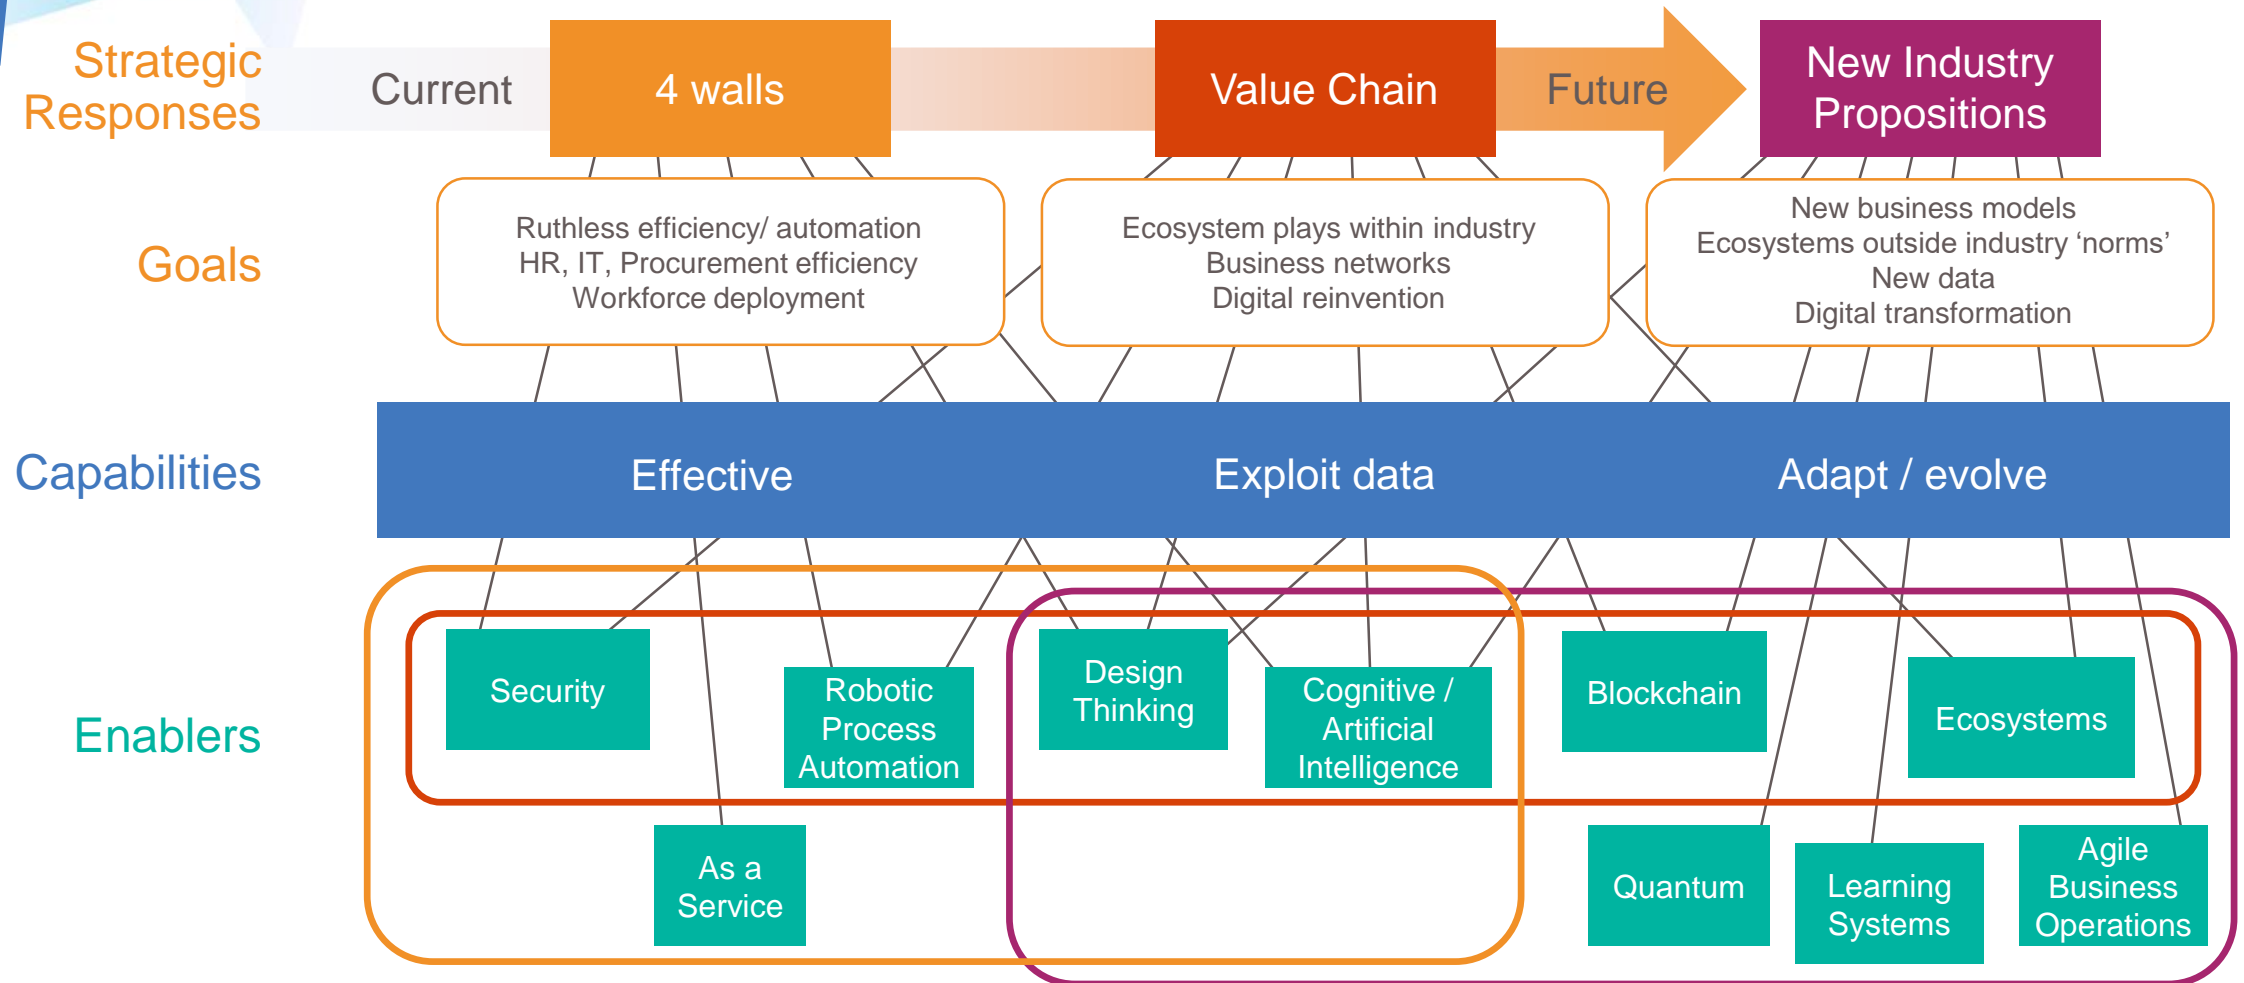

“Reengineer Industry Propositions”

New business models  
New capabilities  
Ecosystems outside industry ‘norms’  
New data  
Digital transformation

# Capabilities – exploit current ones, create new ones

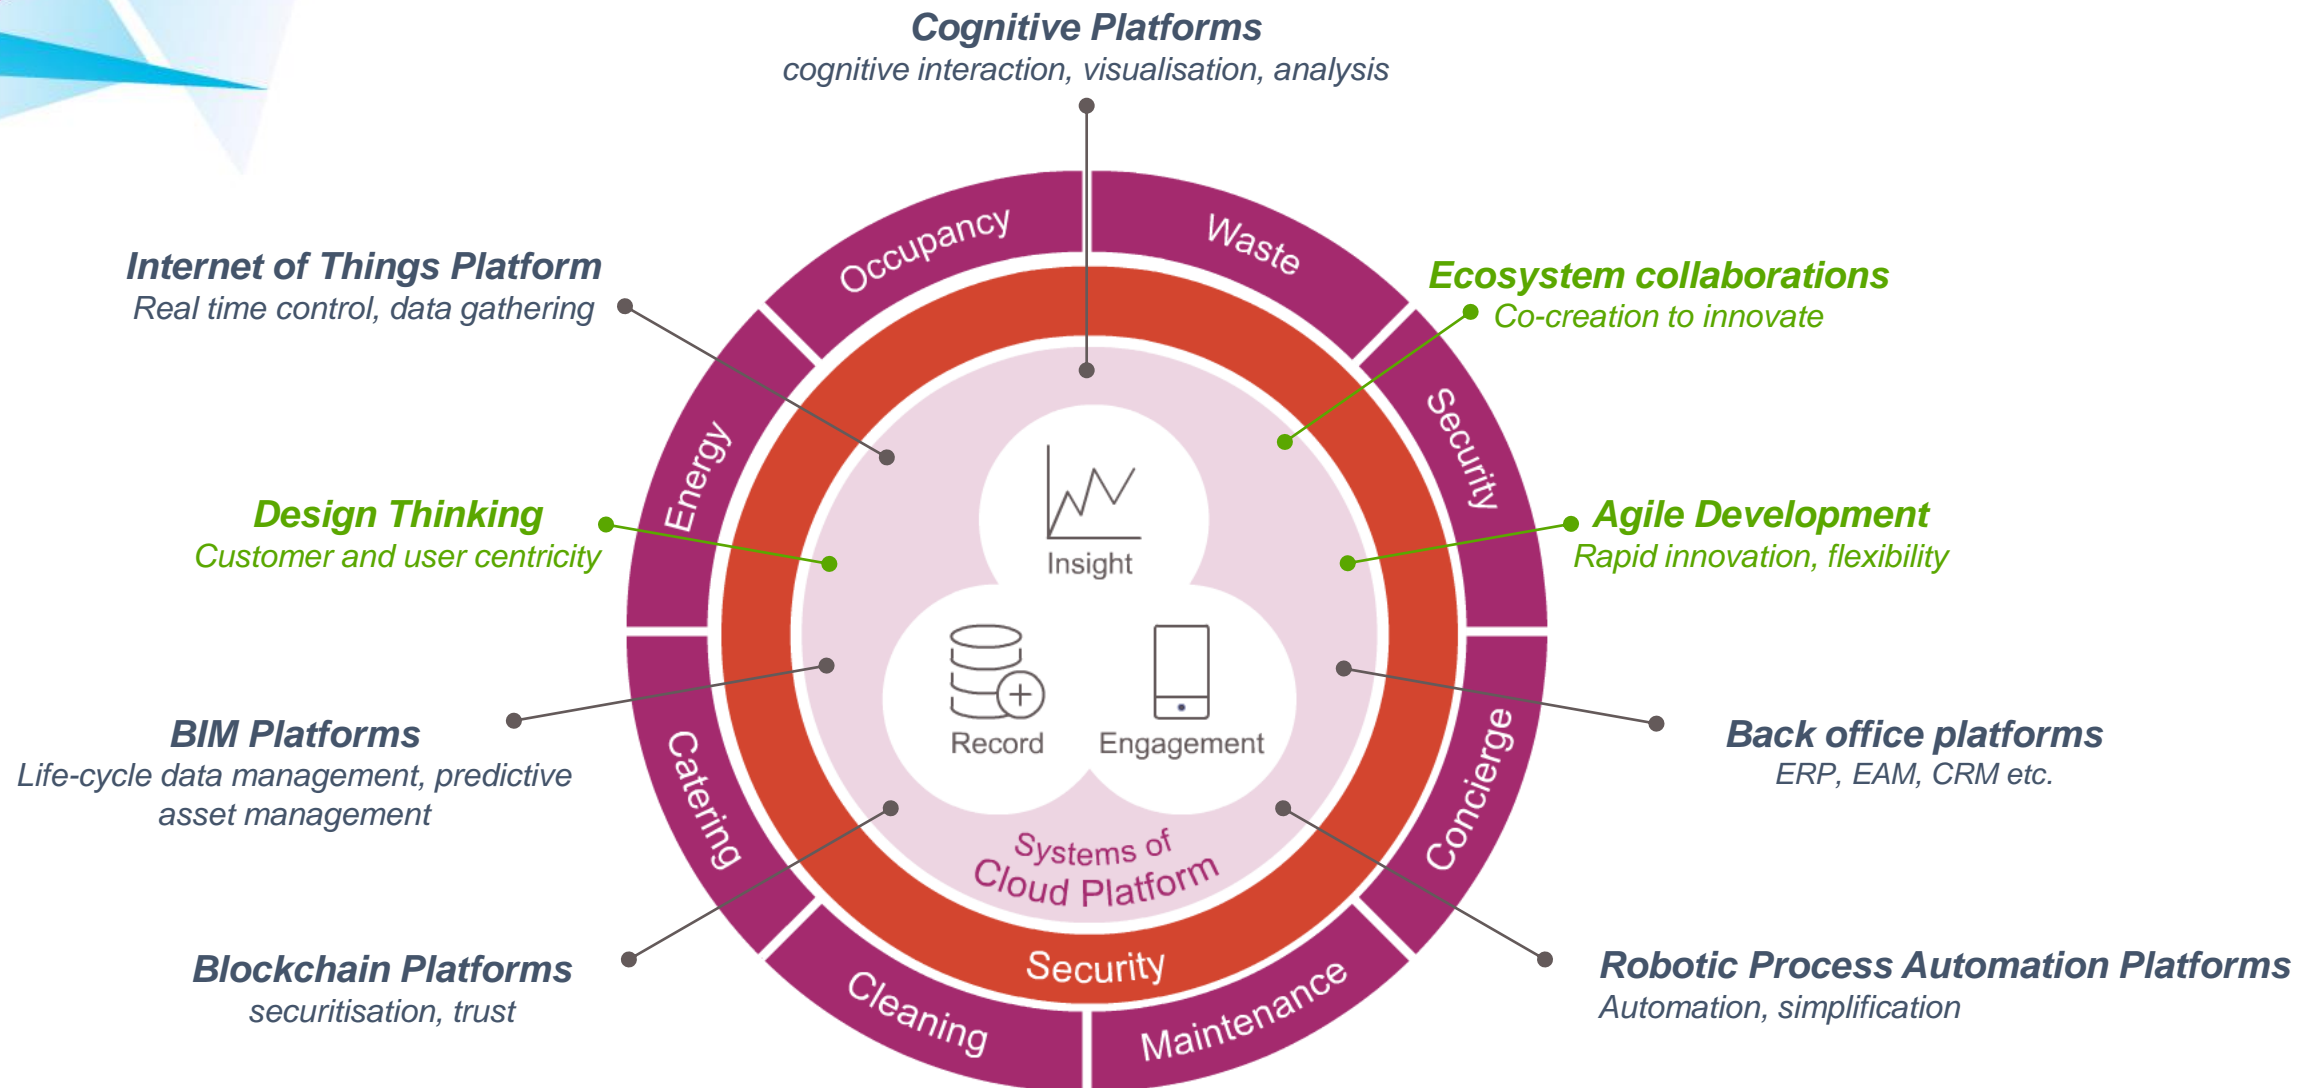

# The future: platform-based Facilities Management enterprise

# Enablers: End-to-end integration of platforms

## Responses from other industries (1/2)

wood. | IBM.

Delivering engineering solutions and services based on advanced digital technology

Bentley strikes deal with gas elves to  
get tanks filled wherever owners park

**Bentley and Filld have teamed up to give owners the luxury of  
freedom from gas station stops, and I've tried out their new service.**

## Responses from other industries (2/2)

- Blockchain - trusted and secure data
- Smart Contracts
- Hyperledger Platform for full supply chain
- Joint Venture backing

- KONE owned Data
- New services – API Ecosystem (e.g. cab hailing)

# Enablers: technology

AI / Cognitive

Analytics

Quantum Computing

Asset Buy Back

Blockchain

Mobility

Design Thinking

Partnerships

Robotics

IoT

Discovery

Visual Recognition

Cloud

Digital

Security

# The Future of Facilities Management

# What this means for you and why now?

## *What does this mean for you?*

- Owning the end-to-end experience is the key
- The confluence of technologies on platforms enables the end-to-end experience
- Focusing on experience allows the creation of new value propositions

## *Why now?*

- There are day to day challenges, ongoing projects and budget constraints but...
- A few first steps now can enable multiple possible futures:
  - ✓ **Define your current state**
  - ✓ **Identify priorities and business cases**
  - ✓ **Gather and “clean” data**
  - ✓ **Integrate IoT in your business**
  - ✓ **Engage your workforce**
  - ✓ **Create learning platforms**

Point-to-point solutions get easily outdated, IBM can move past that creating your unique ecosystem of platforms to enable whatever future you choose.

## Why IBM?

Industry insight  
and understanding

Continuous  
Innovation

Technology

Value chain  
business partnerships

Financing

Risk Sharing in  
your endeavours

Thank you.
